

New Charities only Phone Numbers

- Have an 0800 number, but don't want to cover the cost of incoming calls?
- Use a local number, but want to have much more of a national presence?
- Considered 08 numbers, but felt customers would not want to pay charges after the bad publicity?
- Looking for a memorable number for your charity?

A new range of 03 numbers have been allocated through OfCom by the government in August 2007. These numbers charge callers the price of a local call and the charity nothing. They are only available to charities, non-profit making organisations and public service providers.

Key Benefits:

- They are FREE and "sit" on top of your existing number
- The charity doesn't have to pay for all the incoming calls, drastically reducing telephone bills
- Callers know exactly how much they are paying, just the price of a local call
- Public confidence will be very high due to the allocation rights, unlike the use of 08 numbers

As well as up to 50% savings on call costs compared to BT, we will donate 5% of the total phone bill directly back to the charity every month.
